REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and receiver for processing multipath-propagated components of a signal in a communications system. A search of prior art records has failed to discloses a method comprising; "calculating a weighting value for the impulse response using statistical methods on the basis of the one or more taps in the second matched filter, comparing a deviation between the weighting value and a centre point of the second matched filter with a threshold value set for the deviation, moving the second matched filter forward when the deviation exceeds the threshold value set for exceeding the deviation, moving the second matched filter backward when the deviation undershoots the threshold value set for undershooting the deviation, and repeating the calculating a weighting value, comparing a deviation, moving the second matched filter forward and moving the second matched filter backward during reception of the signal" or a computer program for such as disclosed in claims 1 and 13 respectively. Nor does the prior art teach a receiver comprising; "means for matching the one or more taps to a second matched filter which is shorter than the first matched filter, means for comparing a deviation between a weighting value and a centre point of the second matched filter with a threshold value set for the deviation, means for moving the second matched filter onward when the deviation exceeds the threshold value set for exceeding the deviation, means for moving the second matched filter backward when the deviation undershoots the threshold value set for undershooting the deviation, and means for repeating the last four steps during the reception of the signal" along with the remaining limitations of claim 7.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the 2.

examiner should be directed to Lawrence B Williams whose telephone number is 571-272-3037.

The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
